TULANG-TULANG
EXTREMITAS SUPERIOR
TERDIRI DARI:

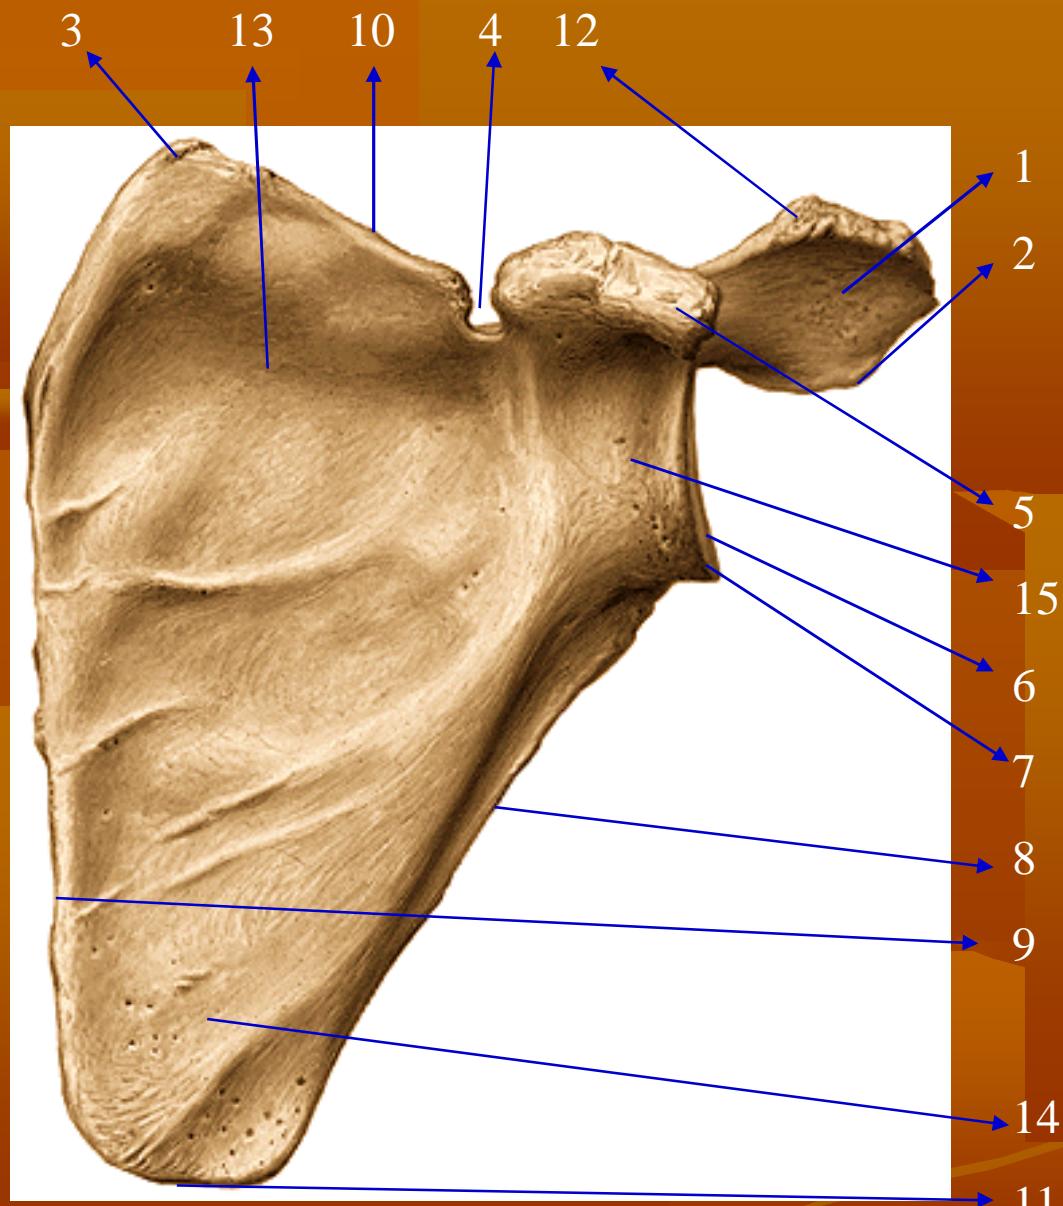

1. Os clavica
2. Os scapula
3. Os humerus
4. Os radius
5. Os ulna
6. Ossa carpalia
7. Ossa metacarpalia
8. Ossa phalanges

OS SCAPULA

OS SCAPULA

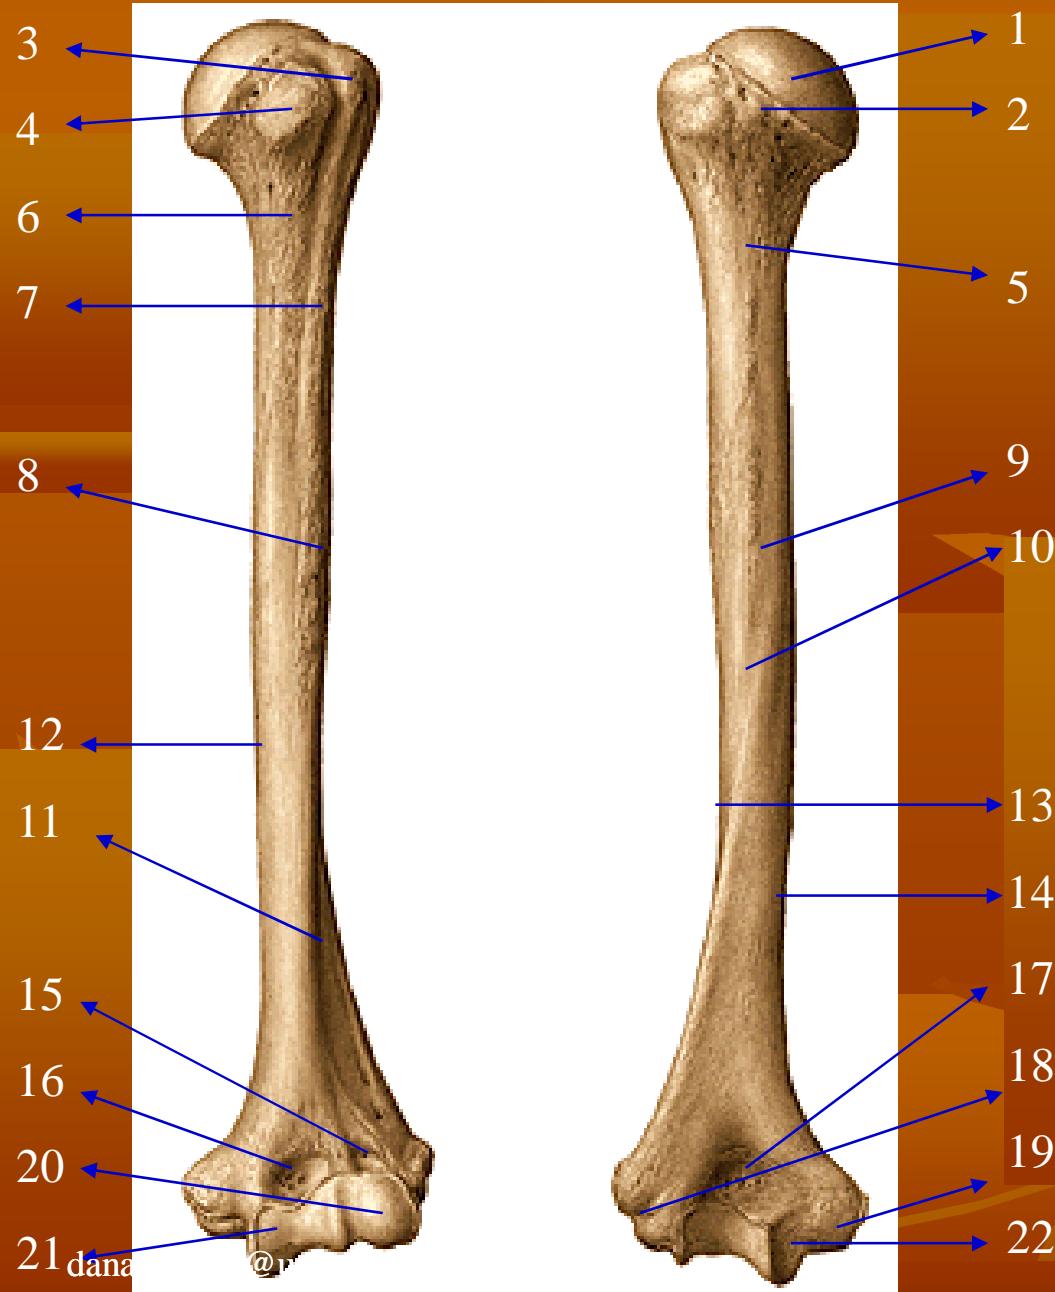

OS CLAVICULA

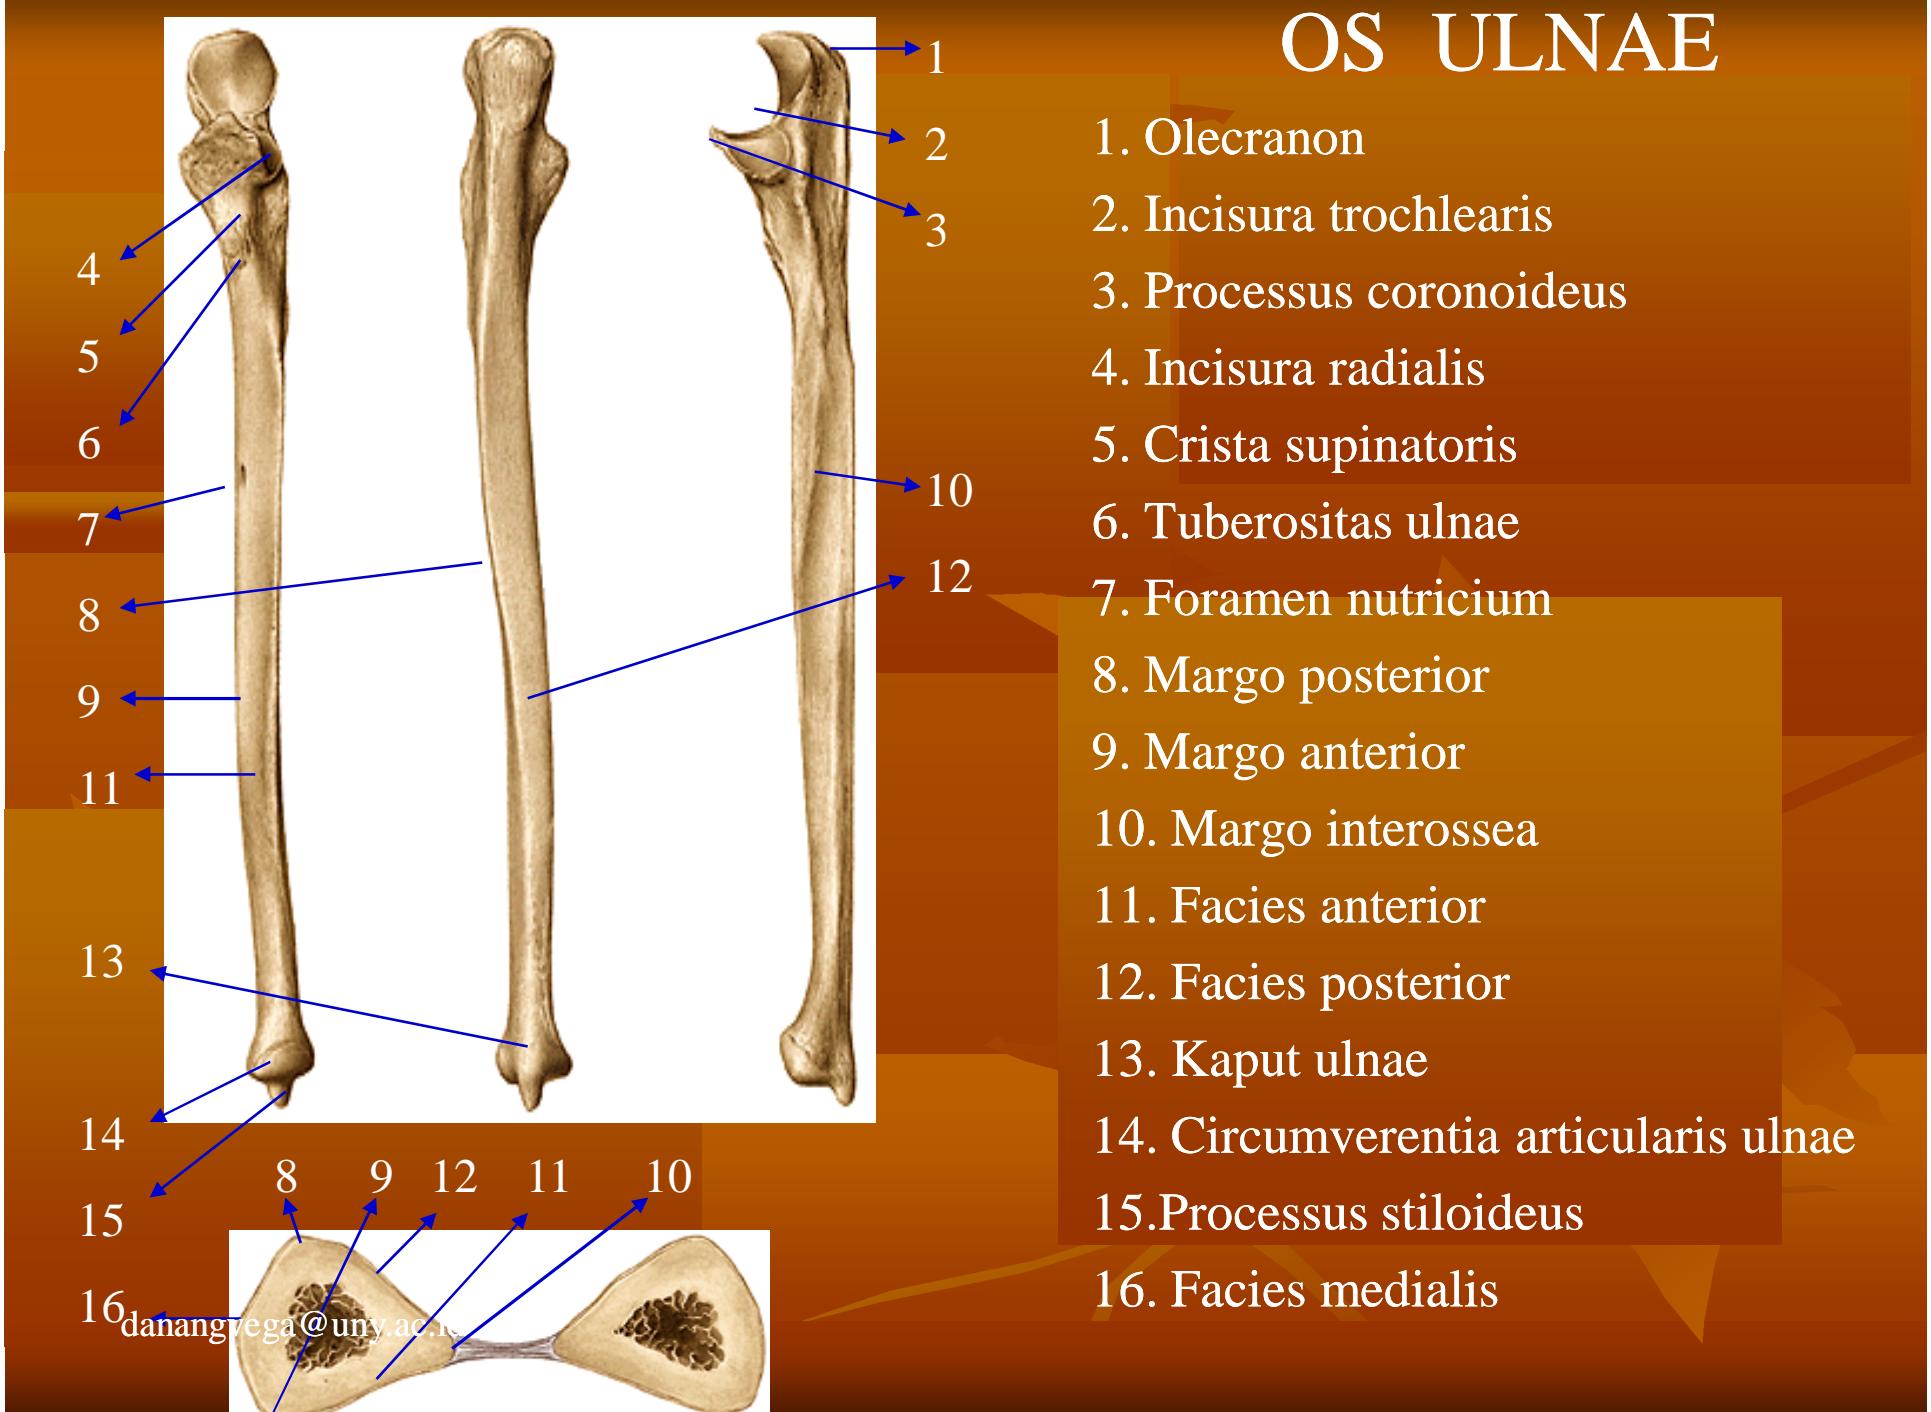

(kiri)

1. Extremitas acromialis
2. Extremitas sternalis
3. Facies articularis acromialis
4. Facies articularis sternalis
5. Linea trapezoidea
6. Tuberculum conoideum
7. Impressio ligamenti costoclaviculatis

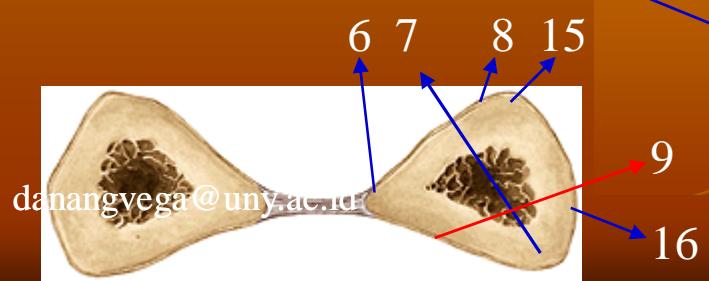

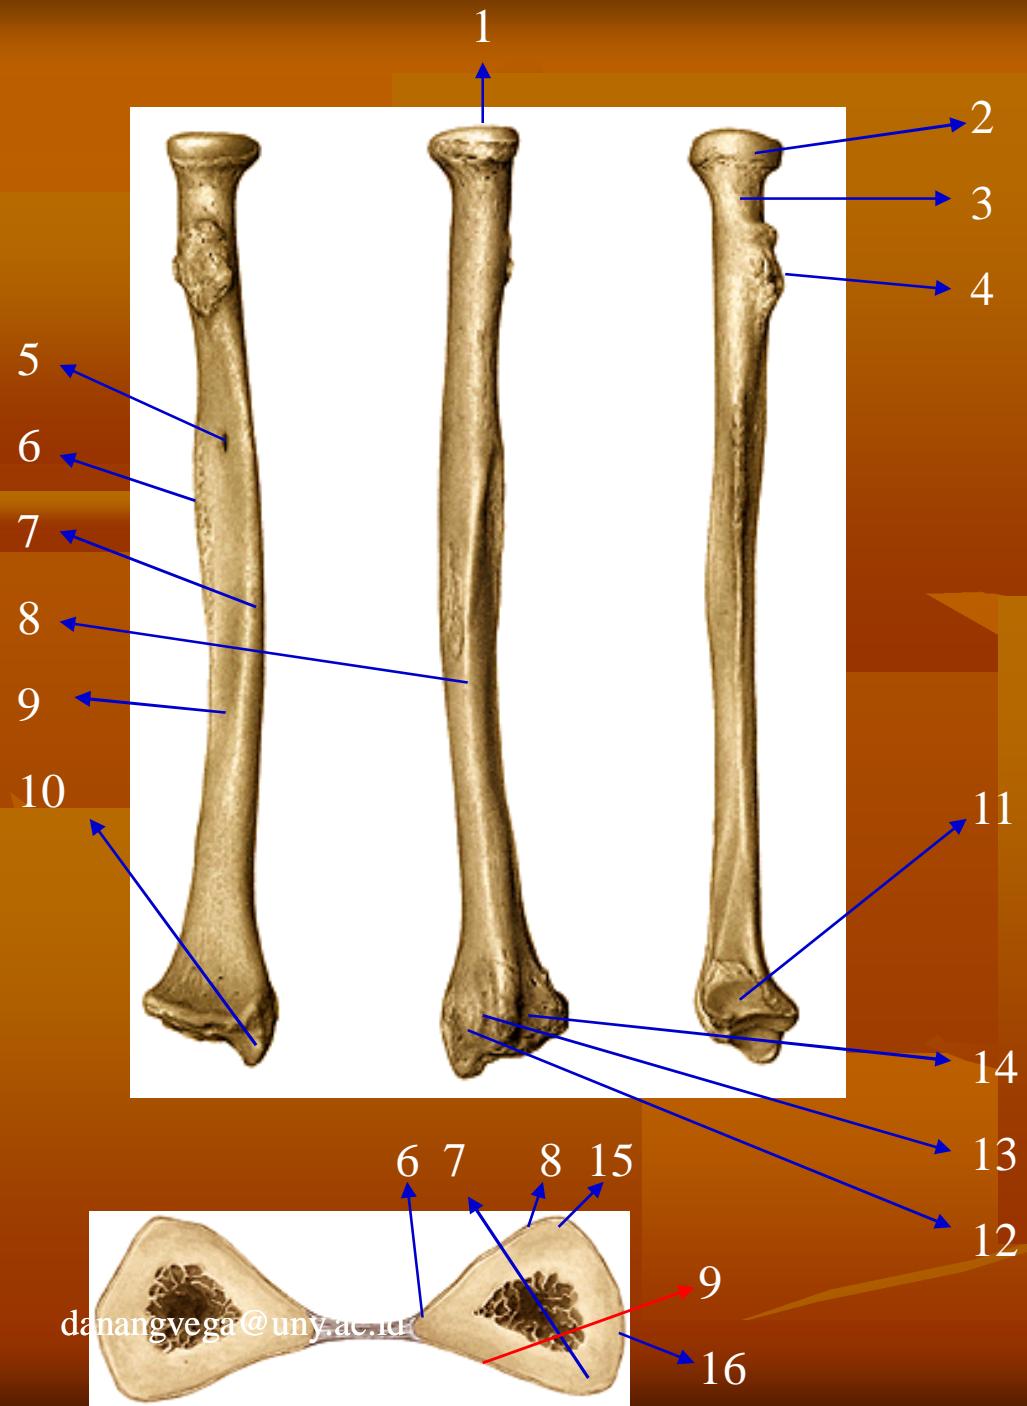

OS HUMERUS

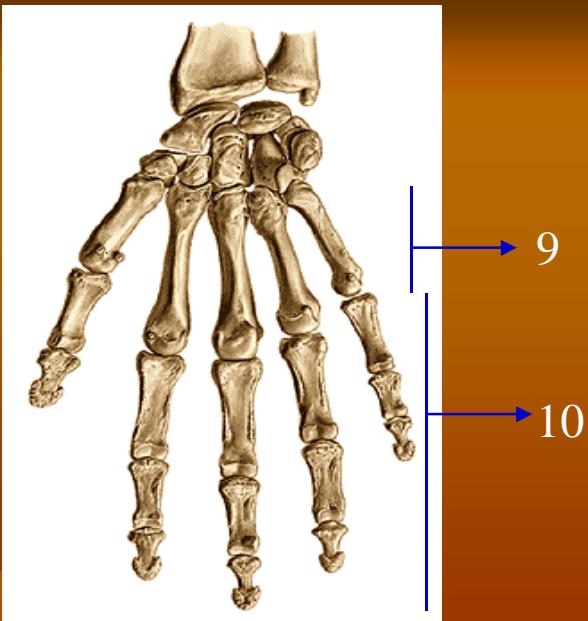

OS ULNAE

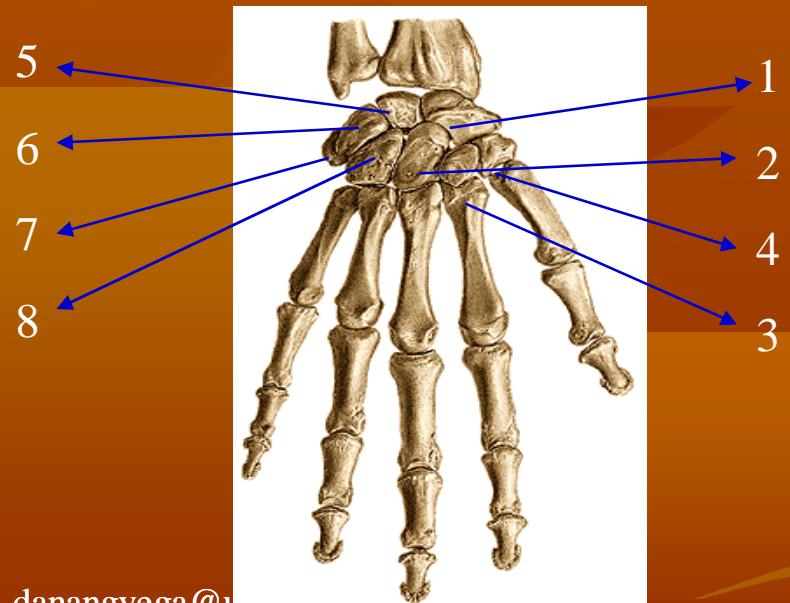

OS RADIUS

danangvega@uny.ac.id

ventral

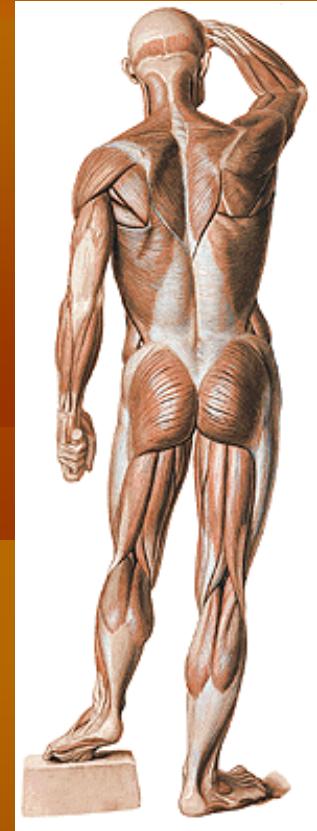

dorsal

danangvega@unimed.edu.id

OSSA CARPALIA (kanan)

1. Os schapoideum
2. Os capitatum
3. Os trapezoideum
4. Os trapezium
5. Os lunatum
6. Os triquetrum
7. Os pisiforme
8. Os hamatum
9. OSSA METACARPALIA
10. OSSA DIGITORUM:
 - a. phalanx proximalis
 - b. phalanx media
 - c. phalanx distalis

SISTEM ALAT GERAK ANGGOTA BADAN ATAS

danangvega@uny.ac.id

Prinsip dasar terjadinya suatu gerakan:

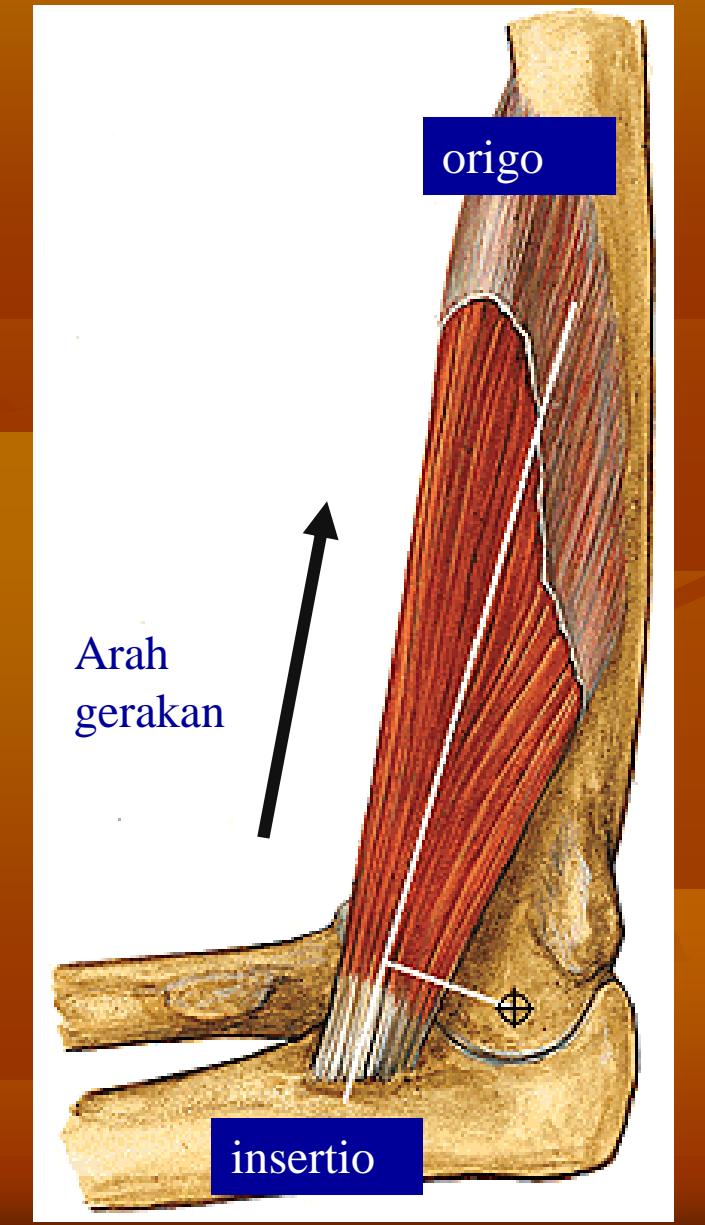

1. Otot harus kontraksi dan menyilangi sendi (kecuali yang melekat pada kulit atau organ tubuh)
2. Gerakan saat kontraksi otot: insersio → origo
3. Sendi: bisa satu aksis/lebih
4. Posisi persilangan otot thd aksis → arah gerakan.
5. Otot dapat menyilangi lebih dari satu aksis sesuai dengan jumlah aksis pada sendi yang disilanginya
6. Otot dapat menyilangi satu sendi (monoartikuler), dan menyilangi lebih dari satu sendi (polyartikuler)
7. Bidang gerakan otot selalu tegak lurus dengan aksisnya.

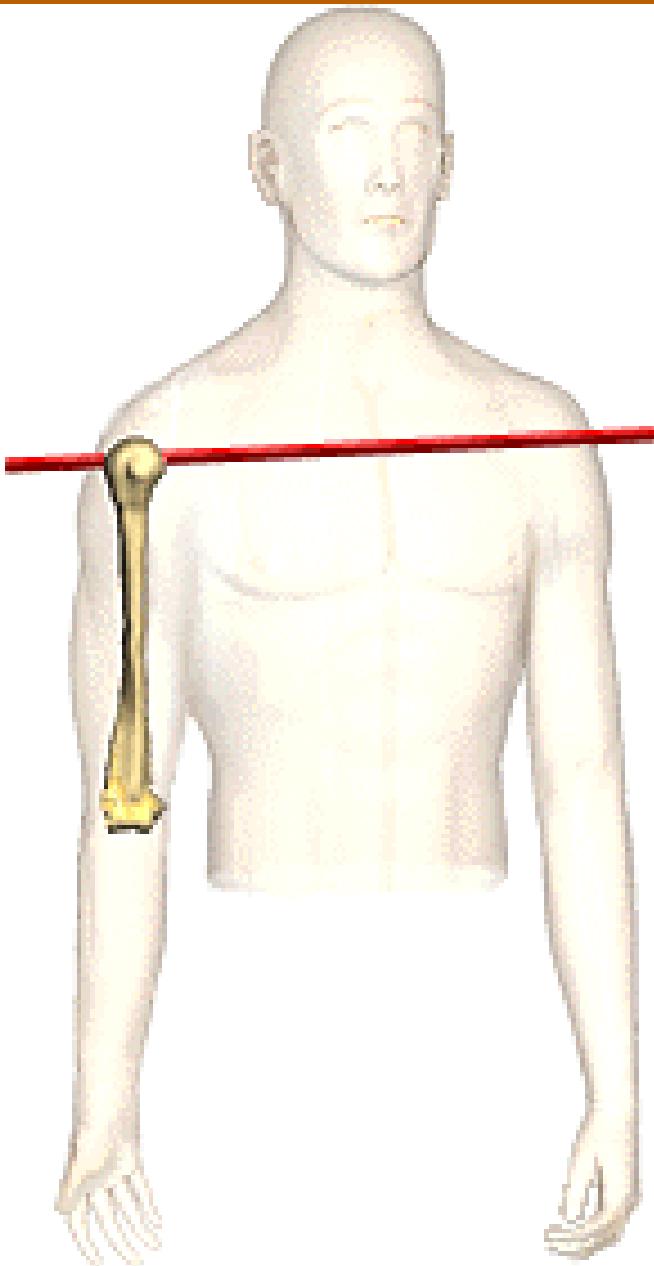

Aksis posisi otot gerakan thd aksis

Sagital medial/inferior adduksi
lateral/superior abduksi

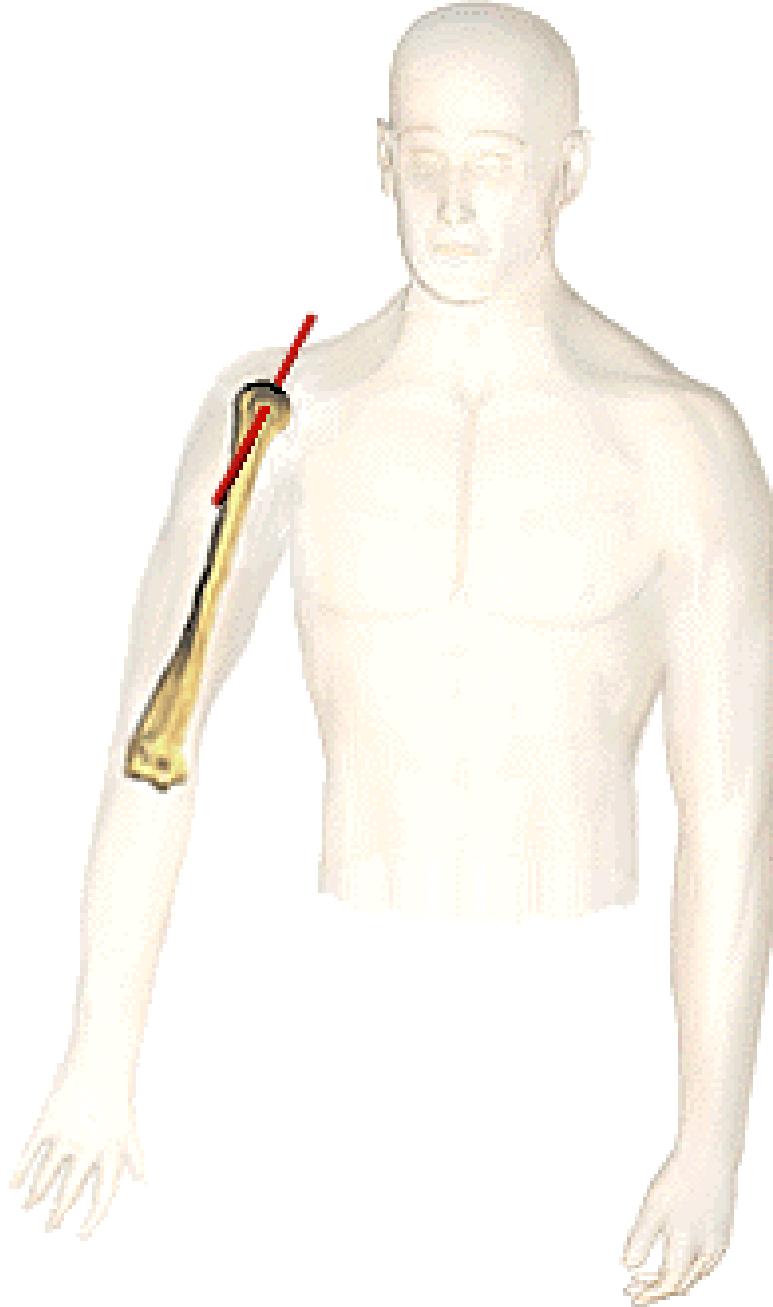

Transversal anterior/superior fleksi/antefleksi
posterior/inferior ekstensi/dorsofl.

Longitudinal medial/anterior endorotasi
lateral/posterior eksorotasi

Ekstremitas superior

Dibedakan menjadi 2 bagian:

1. Tulang-tulang gelang bahu
 - a. os. Claviculae
 - b. os. scapulae
2. Tulang anggota badan bebas
 - a. os. Humerus
 - b. os. Radius
 - c. os. Ulnae
 - d. ossa manus
 - d.1. ossa carpalia (8 tulang)
 - d.2. ossa metacarpalia (5 tulang)
 - d.3. ossa digitorum manus

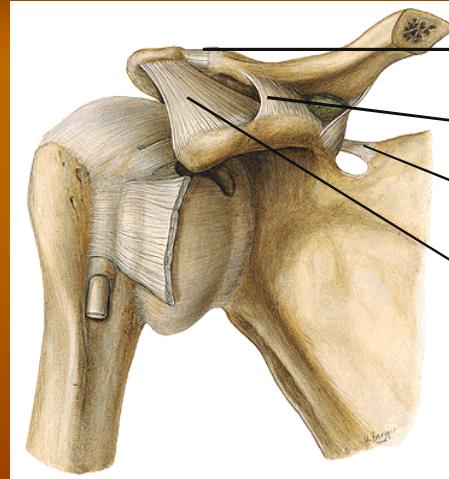

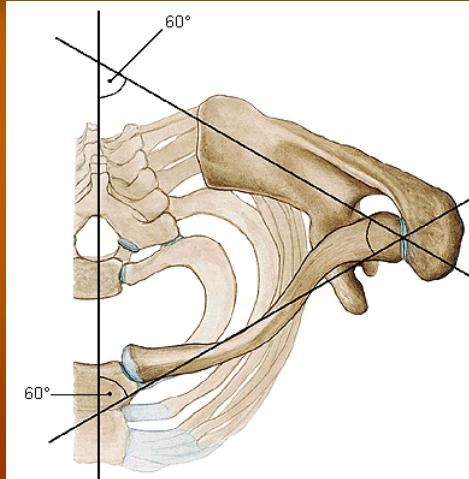

SENDI-SENDI ANGGOTA BDAN ATAS

Discus articularis
Lig. Sternoclav.
Lig. Costoclavic.
Lig. Interclavic.

1. ART. STERNO-CLAVICULARIS:

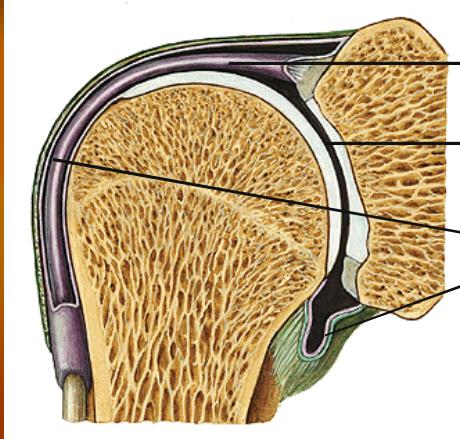

- Berdasar Σ tulang → art. Simpleks: sternum-clavicula
- Berdasar Σ aksis → art. triaksial
- Berdasar bentuk permukaan → art. Sellaris
- Scr fungsional → sendi peluru (sirkumduksi/putaran)

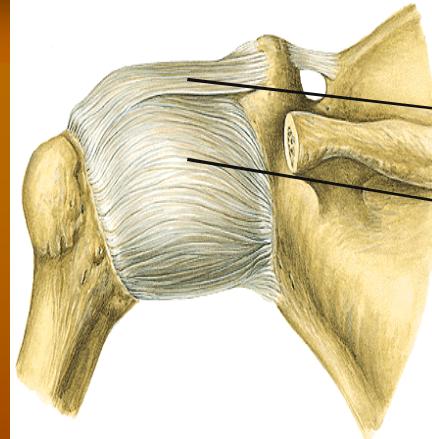

Lig. Acromioclavic.
Lig. Coracoclavic
Lig. Transversum scap.
Lig. Coracoacromiale

2. ART. ACROMIOCLAVICULARIS:

- Scr. Fisiologis → sendi peluru (3 aksis)
- Berdasar bentuk permukaan sendi → art. Globoidea/spheroidea
- Berdasar Σ aksis → art. triaksial
- Berdasar Σ tulang → art. Simpleks: acromion-claviculara

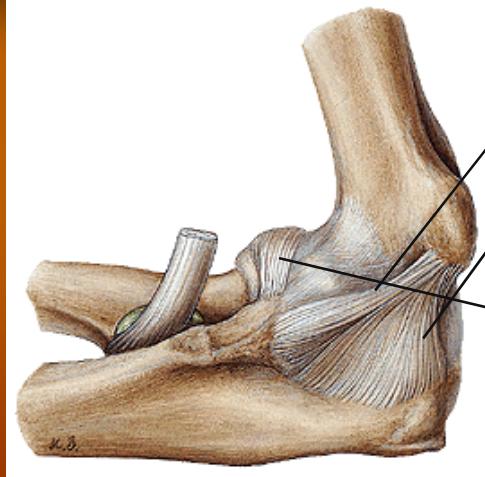

Tendo m. biceps
Cartilago articulare
Capsul sendi

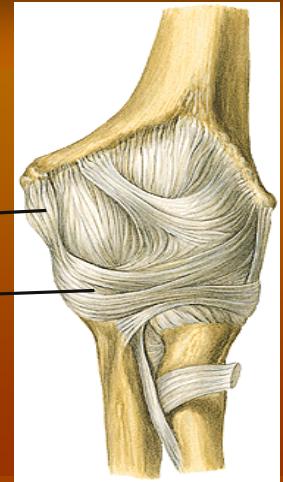

1
Lig. Coracohumerale
Lig. Glenohumerale:
(sup., med., inf.)

3. ART. HUMERI:

- Berdasar bentuk permukaan → art. Globoidea/spheroidea
- Berdasar Σ aksis → triaksial
- Berdasar Σ tulang yang bersendi → simpleks
- Keistimewaan: ada tendo yang melewati ruang sendi
- Selain ligamentum, juga diperkuat oleh otot: m supraspinatus, m infraspinatus, m teres minor, m subscapularis, m deltoideus.
- Luxatio ???

Lig. Collaterale ulnae anterior
Lig. Collaterale ulnae posterior
Lig. Collaterale radiale
Lig. Anulare radii

4. ART. CUBITI (SENDI SIKU):

- Berdasar \sum tlg yang bersendi \rightarrow art. Composita
- Ada 3 bagian : (1) art. Humeroulnaris; (2) art. Humeroradialis; (3)art. Radioulnaris proksimalis

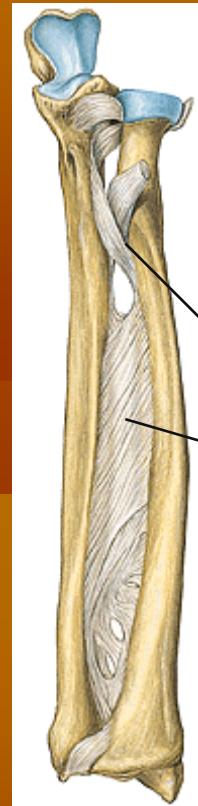

HUBUNGAN ANTARA RADIUS-ULNA:

1. DIASTHROSIS:

Art. Radioulnaris proksimalis & distalis

2. SYNARTHROSIS:

- Berupa syndesmosis radioulnaris (membrana interossea antebrachii)
- Arah serabut miring dari radial atas ke ulna bawah → Fx: melanjutkan gaya dari radius
- Serabut yang lain berlawanan arah: “chorda obliqua”

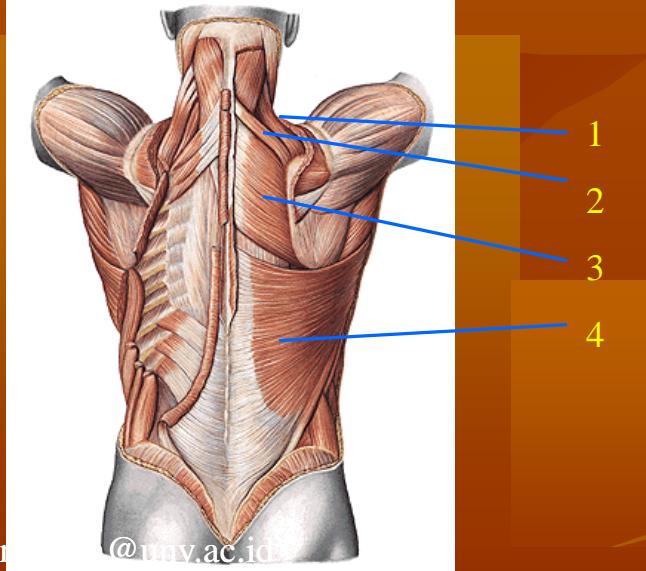

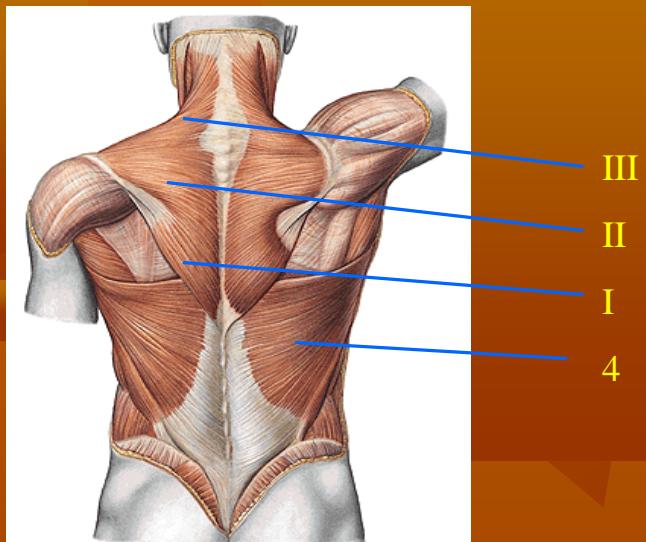

5. ART. RADIOCARPEA:

- Sendi antara lengan bawah – pergelangan tangan
- Merupakan art. Elipsoidea (2 aksis): transversal & sagital

6. ART. METACARPO-PHALNGEAE

7. ART. INTERPHALANGEAE

OTOT BAHU

1. M levator scapulae

o: tub. Post VC1-4
i: angulus med scap
f: mengangkat/men
atik scap ke medial

2. M rhomboideus minor

o: proc spin VC 6-7
i: margo vert scap+ basis
spin scap
f: menarik scap ke med

3. M rhomboideus major

o: proc spin VT 1-4
i: margo vert scap
f: menarik scap ke med

4. M latissimus dorsi

o: proc spin VT 7-12
VL1-5, cr iliaca
i: cr tub min humeri
f: dorsofl, add, endorot
lengan

5. M trapezius

I. pars ascendens

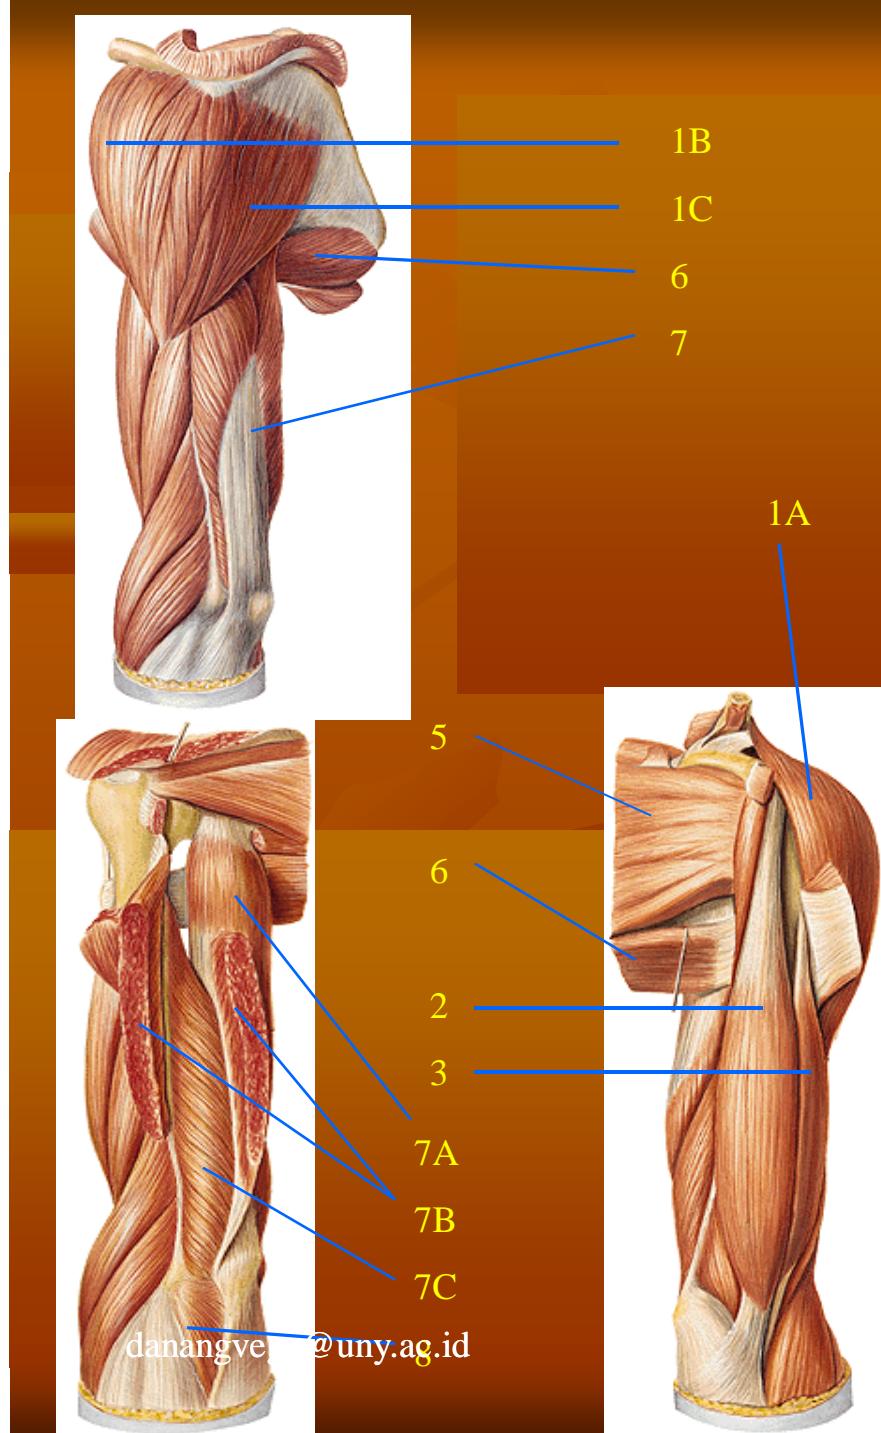

o: proc spin VT 3-12
i: bag med spin scap
f: menarik scap ke bwh

II. Parstransversa

o: proc spin VC 7 VT1-3
i: bag lat spin scap
f: menarik scap ke med

III. Pars descendens

o: protub occ ex 1 n sup,
lig nuchae
i: 1/3 lat clavicula
f: menarik scap ke atas

1. M deltoideus

A. Pars clavicularis
o: bag lateral clavicula
f: antefleksi lengan atas

B. Pars acromialis

o: acromion
f: abduksi lengan atas

C. Pars spinalis

o: spina scapulae
f: dorsofleksi lengan atas
i: tuberositas deltoidea

2. M biceps brachii cap breve

o: procesus coracoideus
f: antefl & add lengan atas

3. M biceps brachii cap long.

o: tub supra glenoidales
f: antefl & abd lengan atas
i: tuberositas radii, fascia antebrachii

4. M coracobrachialis

o: proc coracoideus
i: pertengahan humerus bag medial
f: antefl & add lengan atas

5. M subscapularis

o: fossa scapularis
i: tuberculum minus
f: endorot & add LA

6. M teres major

o: ang inf + m axill scap
I : crista tub minoris
f: add, endorot, dorsofl LA

7. M. triceps brachii

A. Cap longum

o: tub infraglenoidalis
f: add & dorsofl LA

B. Cap laterale

o: dorsal hum prox sulc n r

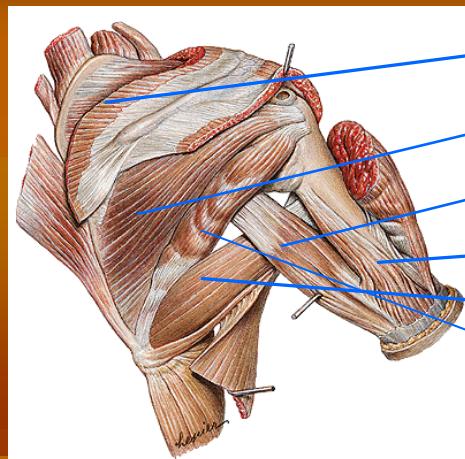

C. Cap mediale

o: dorsal hum distal sul n r
i: olecranon

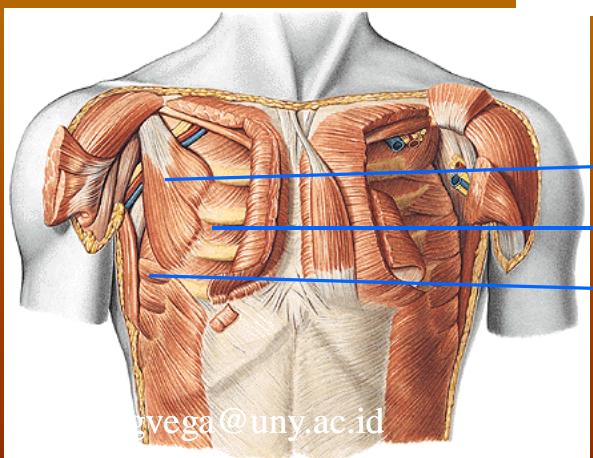

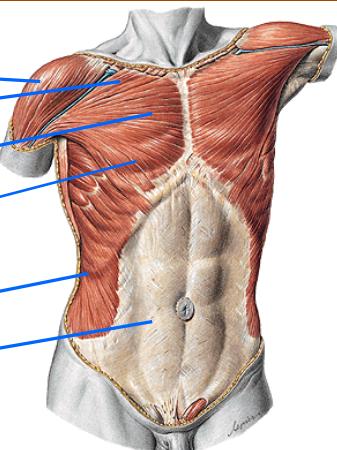

F: ekstensi LB

8. M anconeus

o: epicondylus lat hum
i: marg dors ulna bag prox
f: extensio LB

1. M supraspinatus

o: fossa supraspinata
i: tuberculum majus
f: abd LA

2. M infraspinatus

o: fossa infraspinata
i: tuberculum majus
f: exorot & add LA

3. M triceps br cap long

4. M triceps br cap lat

5. M teres major

6. M teres minor

o: margo axill scap
i: tuberculum majus
f: exorot & add LA

7. M pectoralis major

A. Pars clavicularis

o: 2/3 med clav
f: add, antefl, endorot LA

B. Pars sternocostalis

o: sternum+costa 1-6
f: add, endorot LA

C. Pars abdominalis

o: vag m recti abd
f: add LA

i: crista tub majoris hum

F: add, endorot LA

8. M serratus anterior

o: costa 1-9
i: ang med scap, margo vert scap, angulus inf scap
f: menarik margo verteb ke muka lateral

9. M pectoralis minor

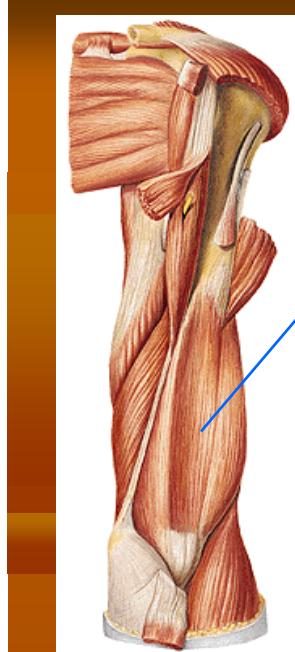

o: costa 3-5
i: proc coracoideus scap
f: menarik proc coracoideus ke muka bwh

10. M deltoideus

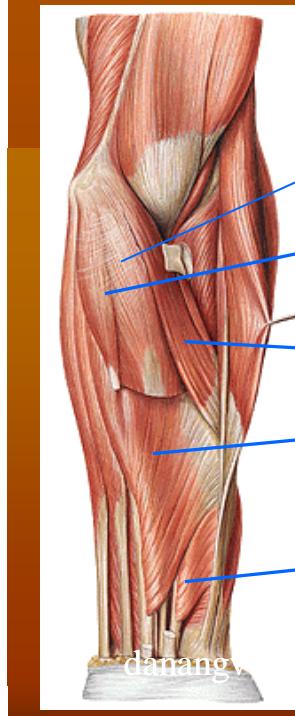

11. M intercostalis

12 m. obliquus ext abd

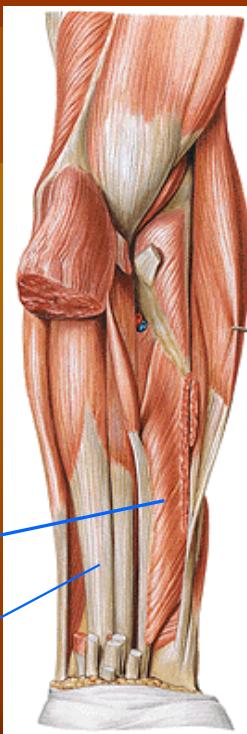

13. M rectus abdominis

1. M brachialis

o: pertengahan bwh
dataran ventral hum

i: tuberositas ulnae

f: fleksi LB

2. M brachiradialis

o: margo lat hum prox
epic lat hum

i: proc stiloideus radii

f: fleksi, supinasi LB

3. M fleksor carpi radialis

o: epic med hum, proc
coronoideus

i : basis ossis metacarpalis
II & III

f: fleks& pron LB, fleks &
abd rad tangan

4. M palmaris longus

o: epic med hum, proc
coronoideus ulnae

i: aponeurosis palmaris

f: fleks, pron LB, flek tgn

5. M fleksor carpi ulnaris

o: capit hum, epic med
hum, cap & margo
dorsale ulnae

i: os pisiforme

f: fleks, abd ulnar tgn

6. M fleksor digitorum sup

o: cap hum uln: epic med
hum, proc coronoideus ;
cap rad: dat ventral rad

i: sisi2 phalanx media

f: fleksLB, fleks phalanx,
fleks tgn, abd ulnar tgn

7. M pronator teres

o: cap hum: epic med hum
cap ulnare: proc coron

i: pertnghn ventral rad

f: fleks, pronasi LB

8. M fleksor pollicis longus

o: dataran ventral rad

i: phalanx dist jari I

f: fleks phal, opposisi jr I,
flek tgn, abd rad tgn

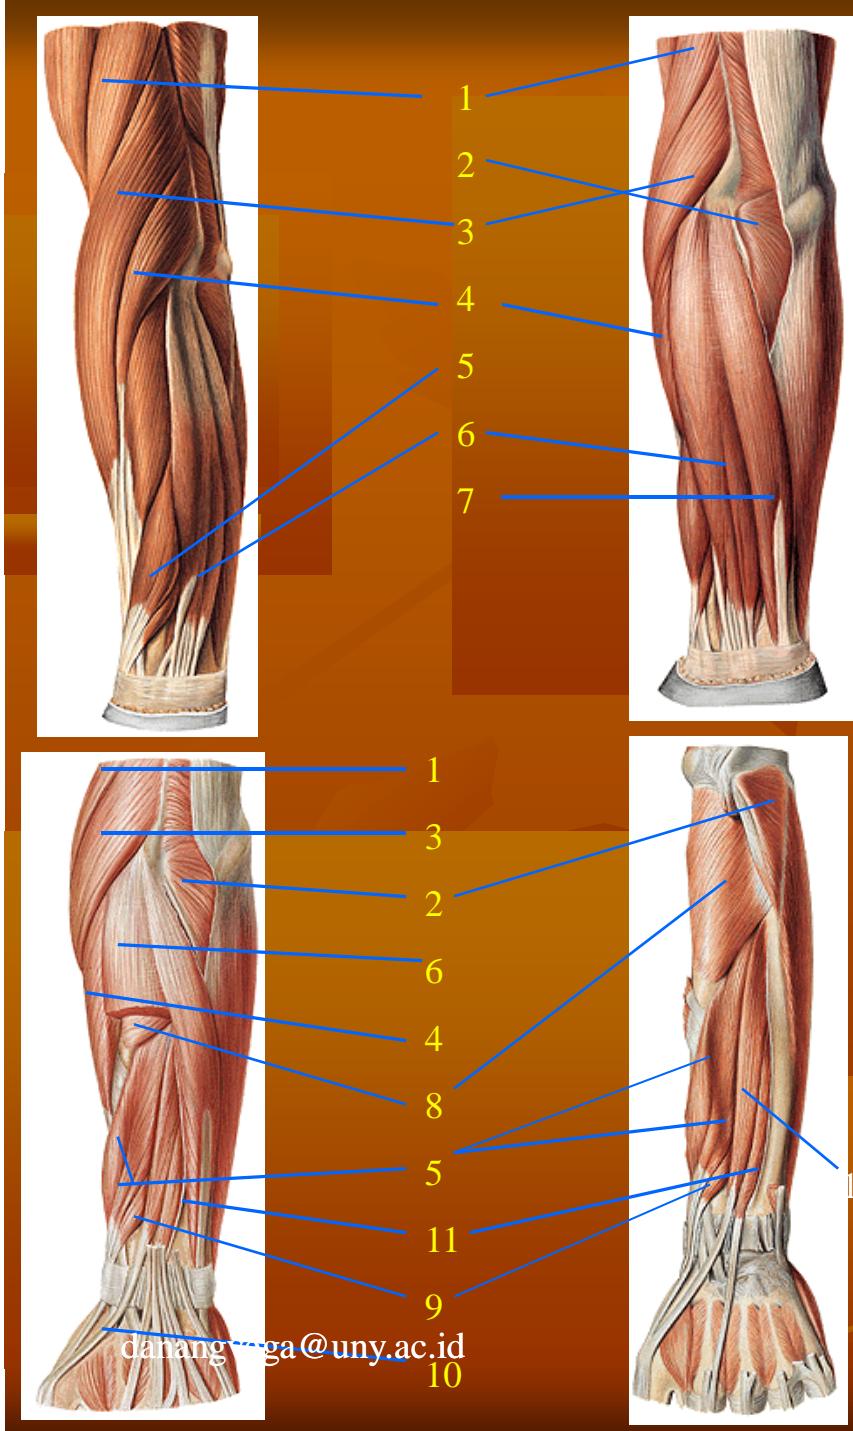

9. M fleksor digitorum

profundus

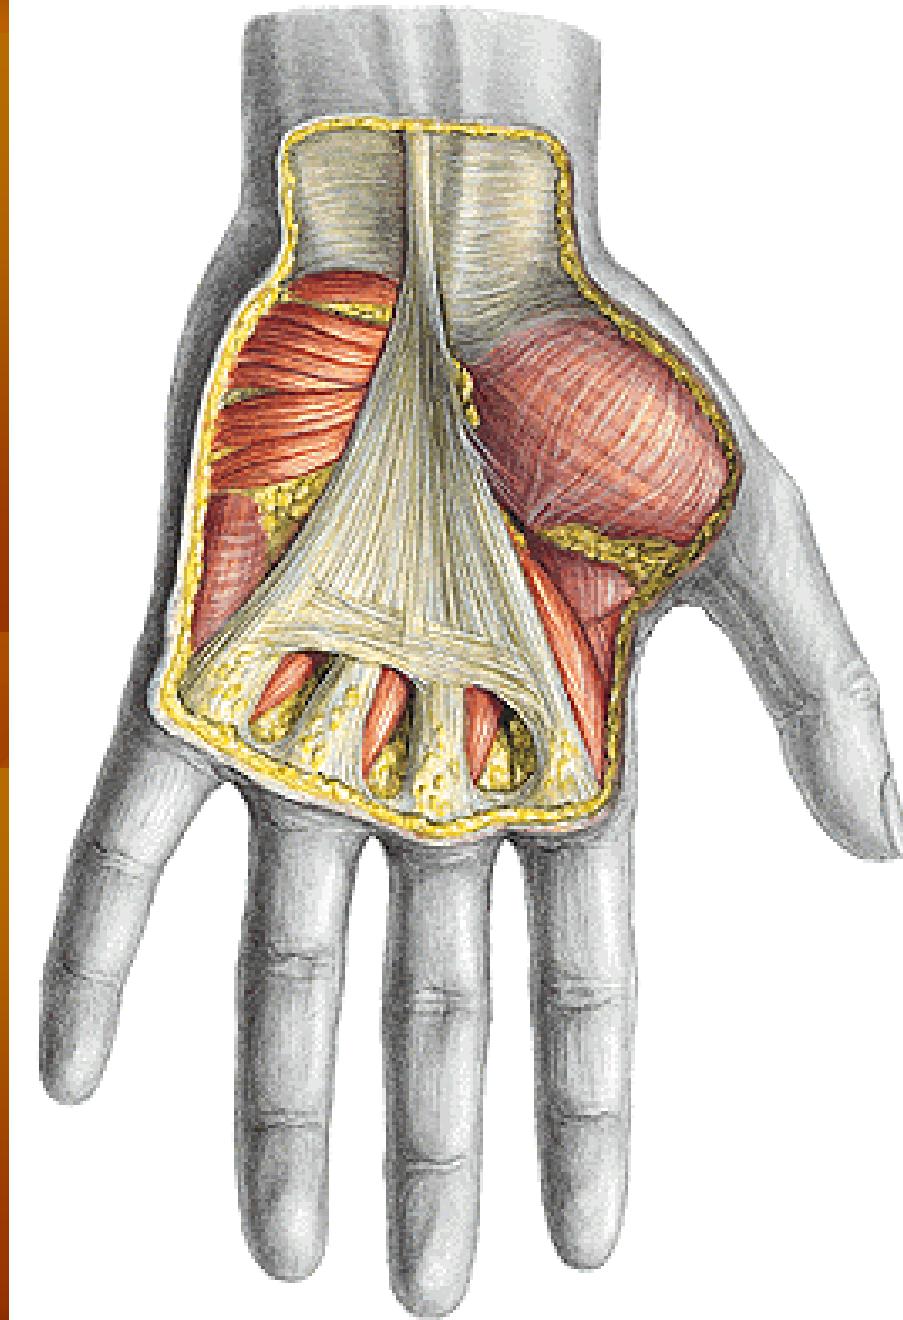

o: dat ventral ulnae

i: phalanx dist jari II-V

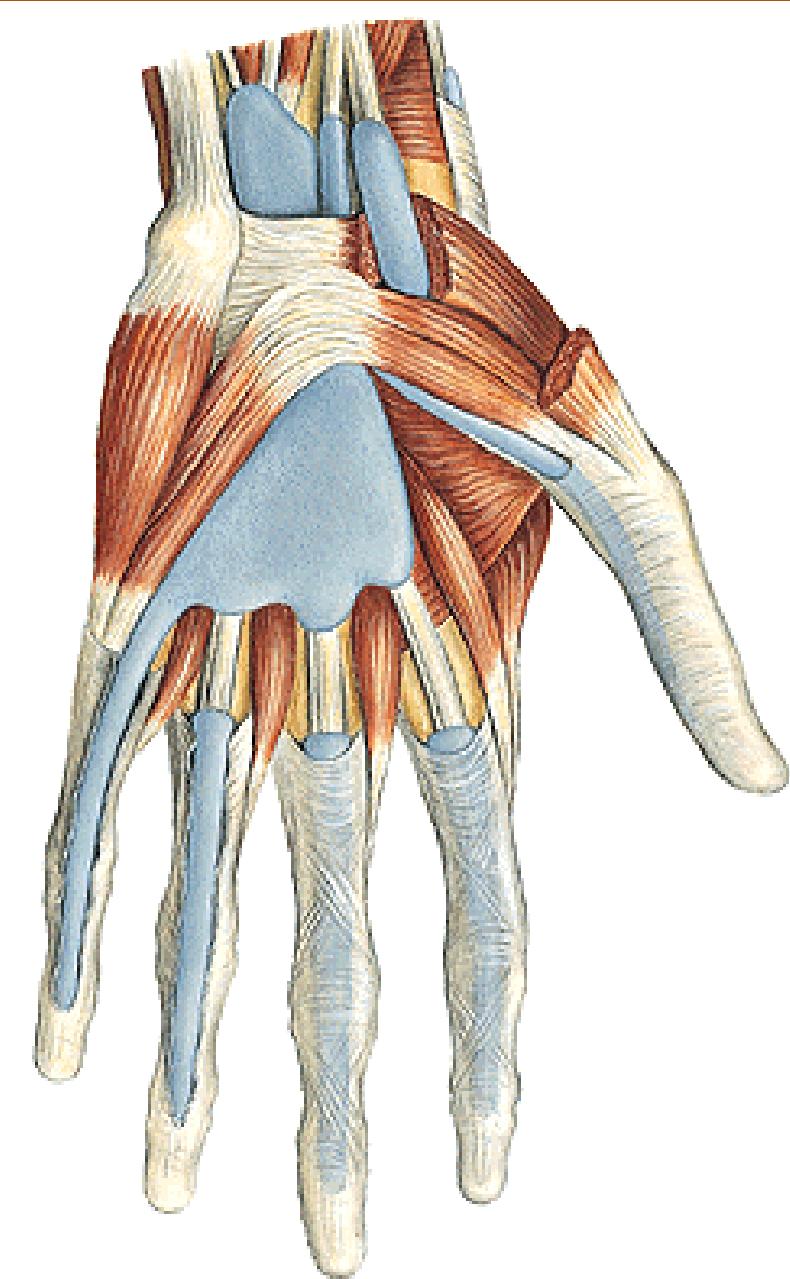

f: fleks phal, fleks tgn, abd
ulnar tgn

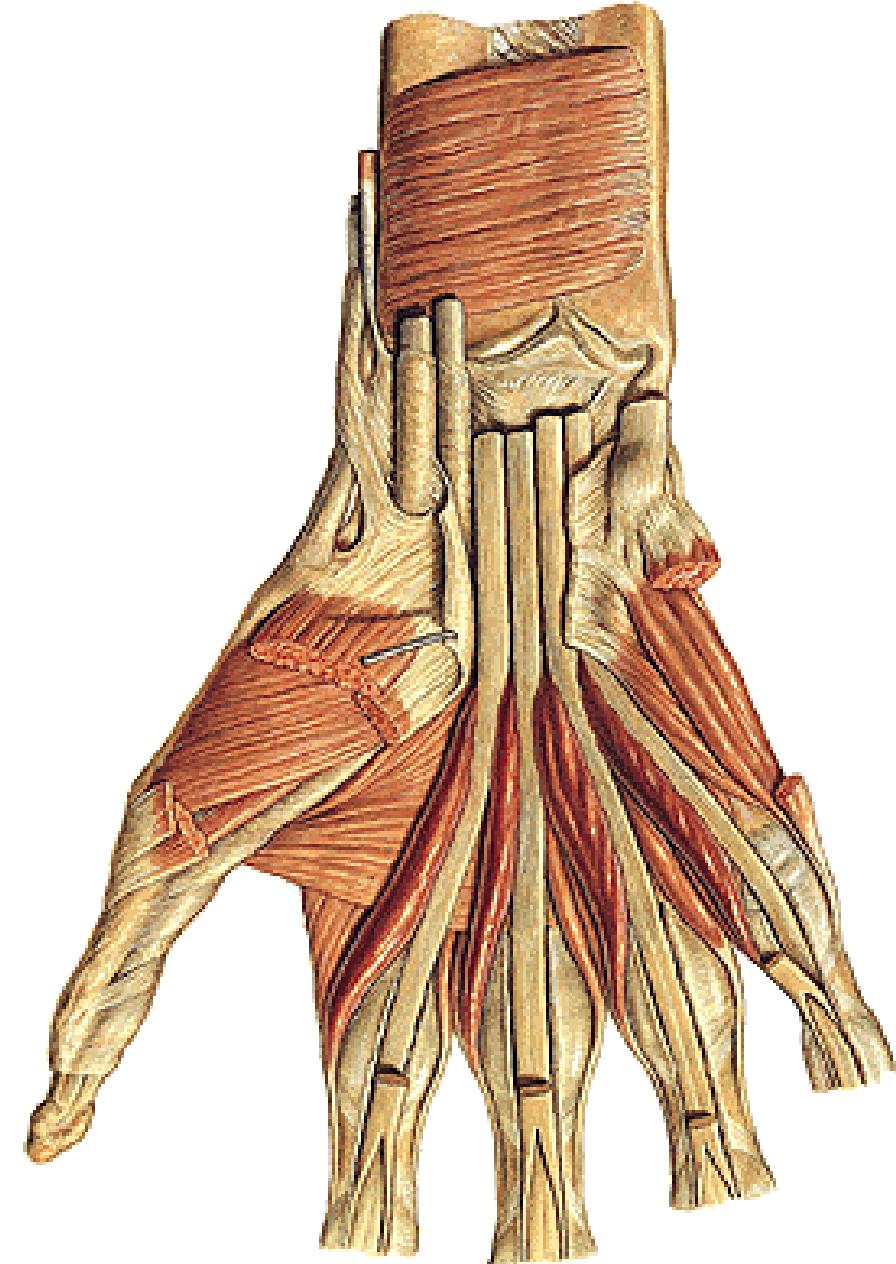

- 1. M brachioradialis**
o: cap hum: epic lat hum,
cap ulnare: margo dors
ulnae
i: basis ossis metacarp V
