I. DESKRIPTSI MATA KULIAH
Covering equal proportions of theory and practice, this course is concerned with major theories of the essential concepts of psycholinguistics, language acquisition, and language and mind. The topics to be covered include the basic concepts of psychological and verbal processes of production and perception of language, children language acquisition, language and mind, and language disorders.

To get the effectiveness of the learning process, students are required to:
1. present the topics (in group),
2. make small research (in group of three) about the process of children (Age:0-5 years old) language acquisition (as major assignment, due before the final test),
3. sit mid-semester and final test, and
4. complete minor assignments as occasion demands.

II. STANDARISASI KOMPETENSI MATA KULIAH
Upon the completion of the course students are expected to have:
1. a good understanding of the essential concepts of psycholinguistics, language production and perception, language acquisition, and how the brain works in language production and perception,
2. a good attitude to the language phenomena in the environment,
3. motivation to add knowledge and experience by asking or consulting with the lecturer, looking at various learning resources about psycholinguistics, and by making a research about language phenomena.
